Headline

LOUGH: Legacy Overlay Unified Graphics Hub

Subtitle

Archiving the Bio-Kinetic Soul of Master Artistry

Core Statement

A multimodal framework for high-fidelity performance capture, biometric telemetry, and autonomous mechanical execution.

System Status

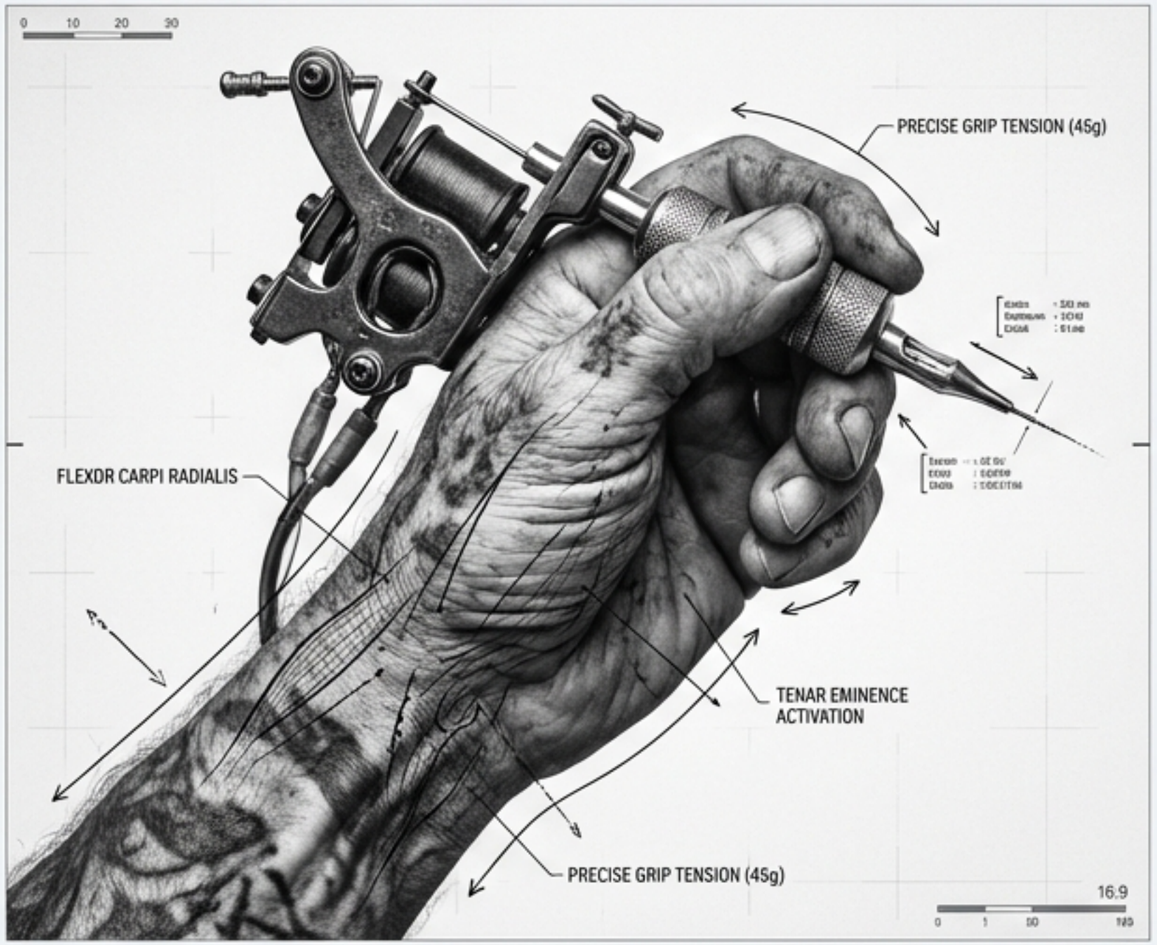
Status: V0.1 PROTOTYPE // INITIALIZING

NotebookLM

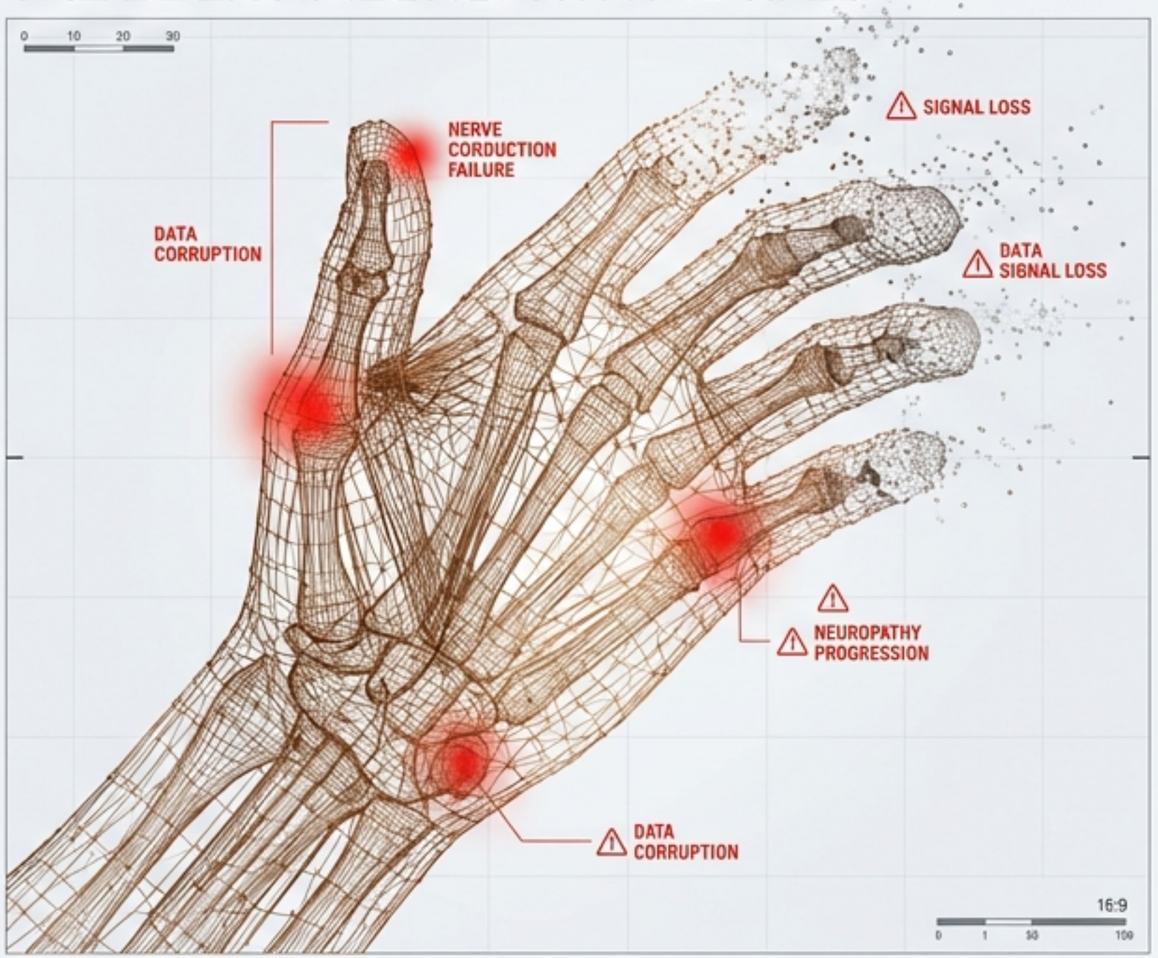
THE CRISIS OF MASTERY: THE MORTALITY OF THE HAND

Subject: Lancy Lough, 40 years of tacit knowledge.

THE MASTER (LANCY LOUGH)



THE DECAY (NEUROPATHY & TIME)

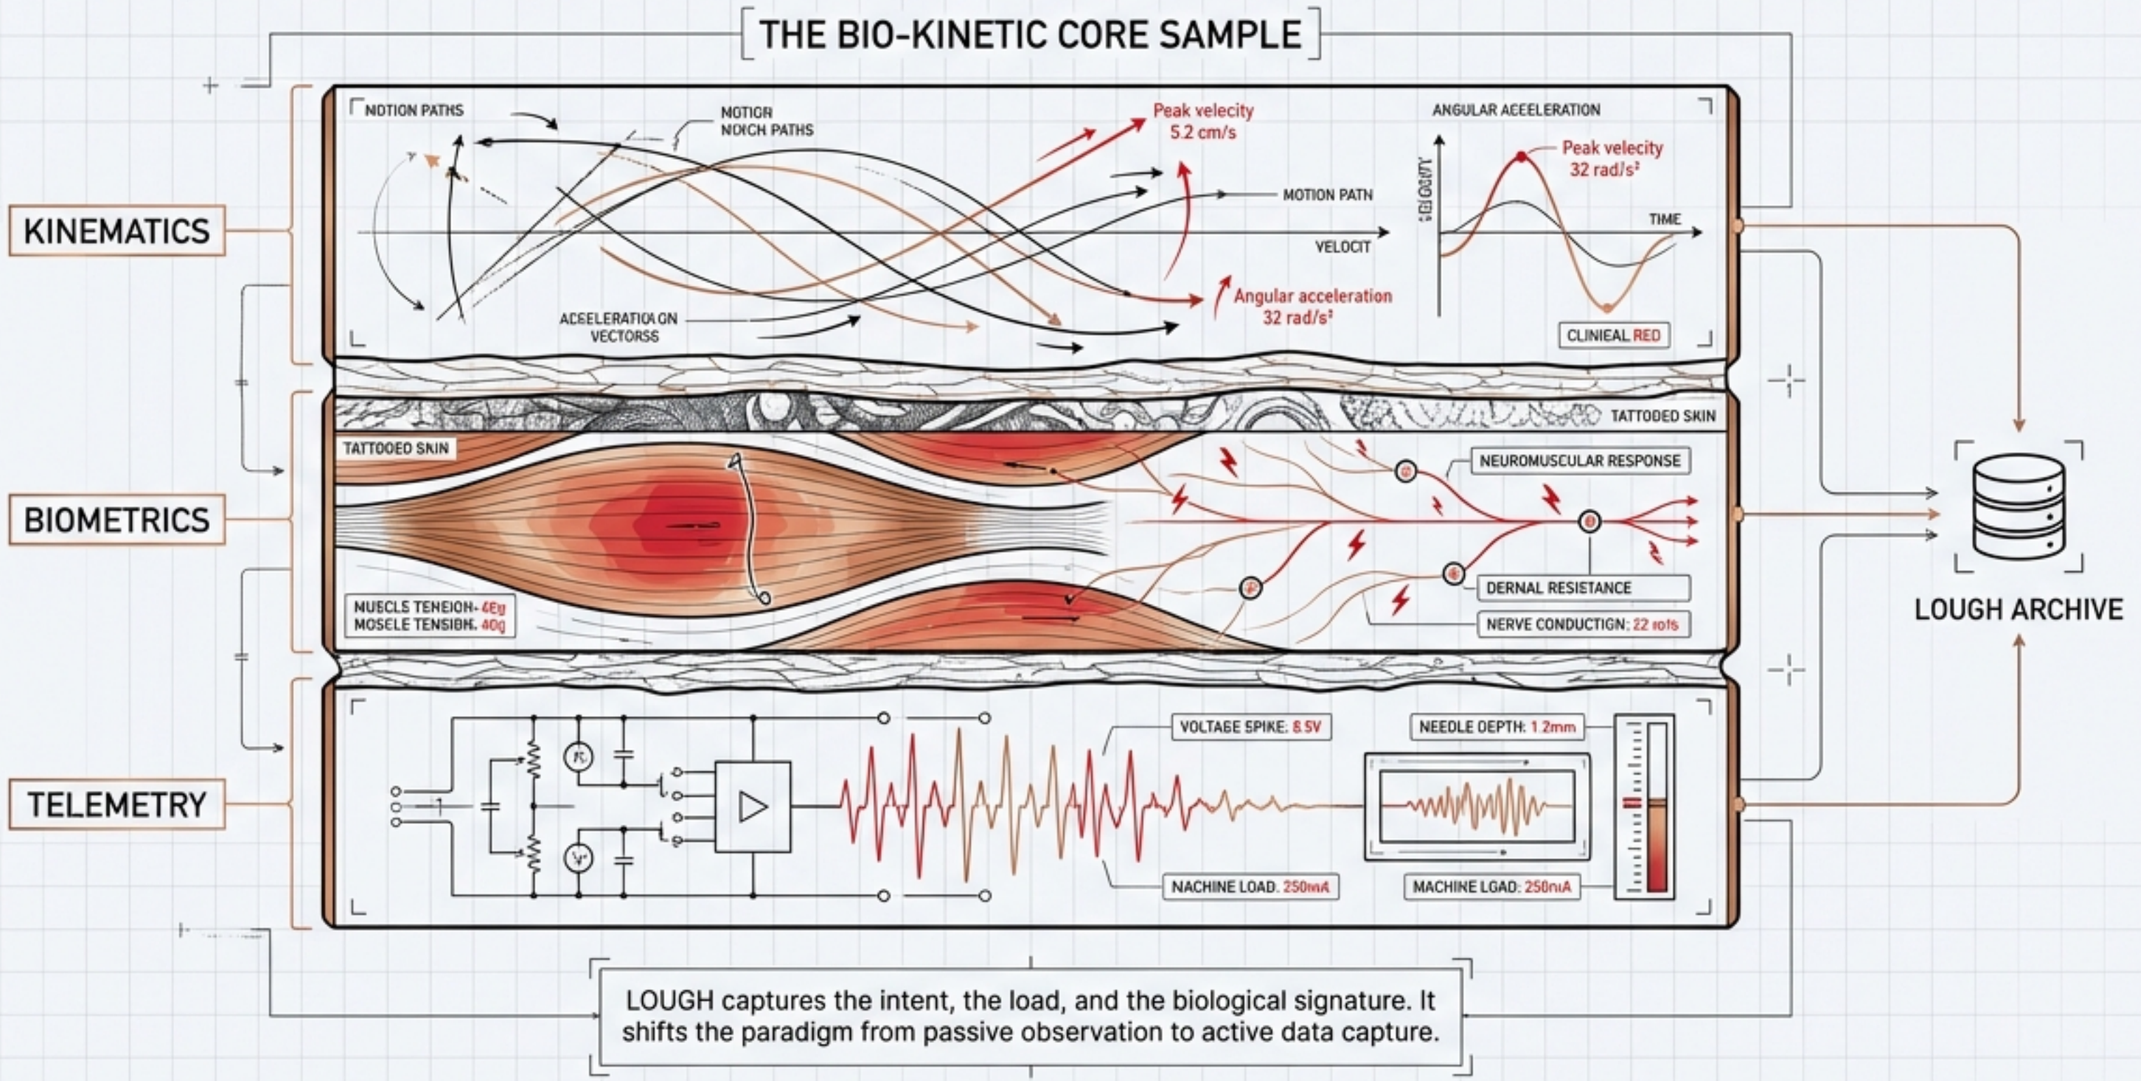


Problem: Neuropathy threatens the loss of "Loughian" technique—specific muscle tension patterns for lining and shading.
Insight: We preserve music and writing, but we have never successfully preserved motor skill at high fidelity.
Risk: When the artist dies, the technique dies.

NotebookLM

THE SOLUTION: THE LIVING ARCHIVE

Beyond Video Recording. A Mathematically Executable Digital Twin.

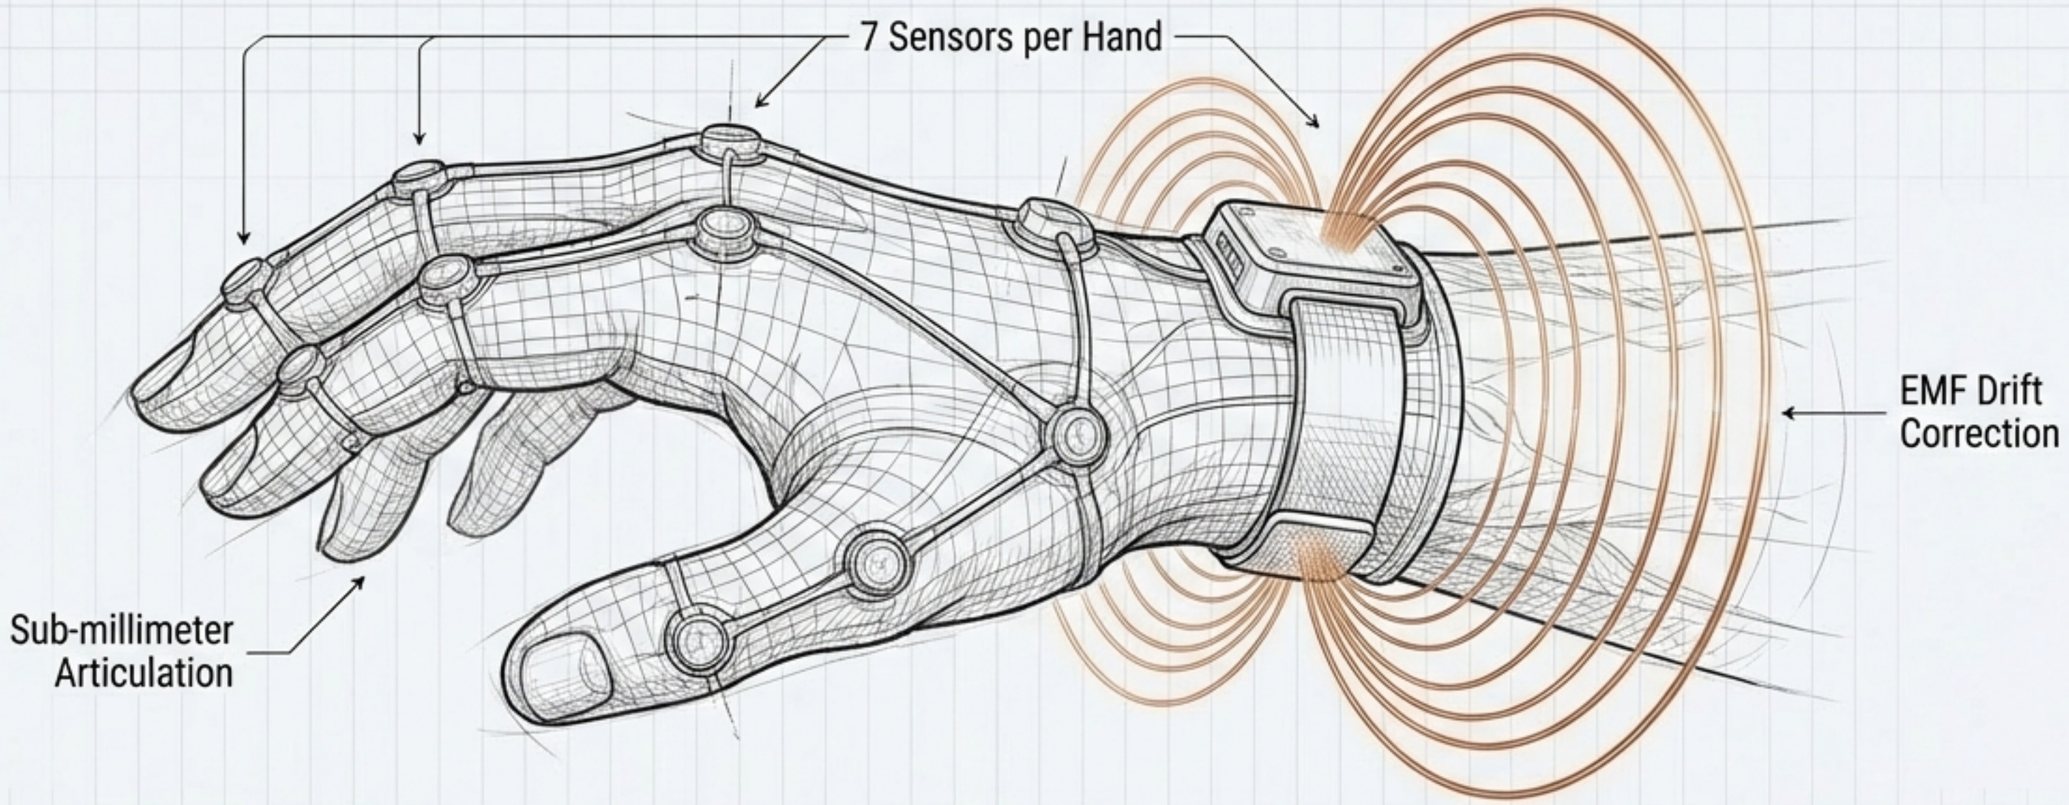


LOUGH captures the intent, the load, and the biological signature. It shifts the paradigm from passive observation to active data capture.

NotebookLM

LAYER 1: HIGH-FIDELITY ACQUISITION (VISION & INERTIAL)

The 'Gollum' Standard in a Cluttered Environment



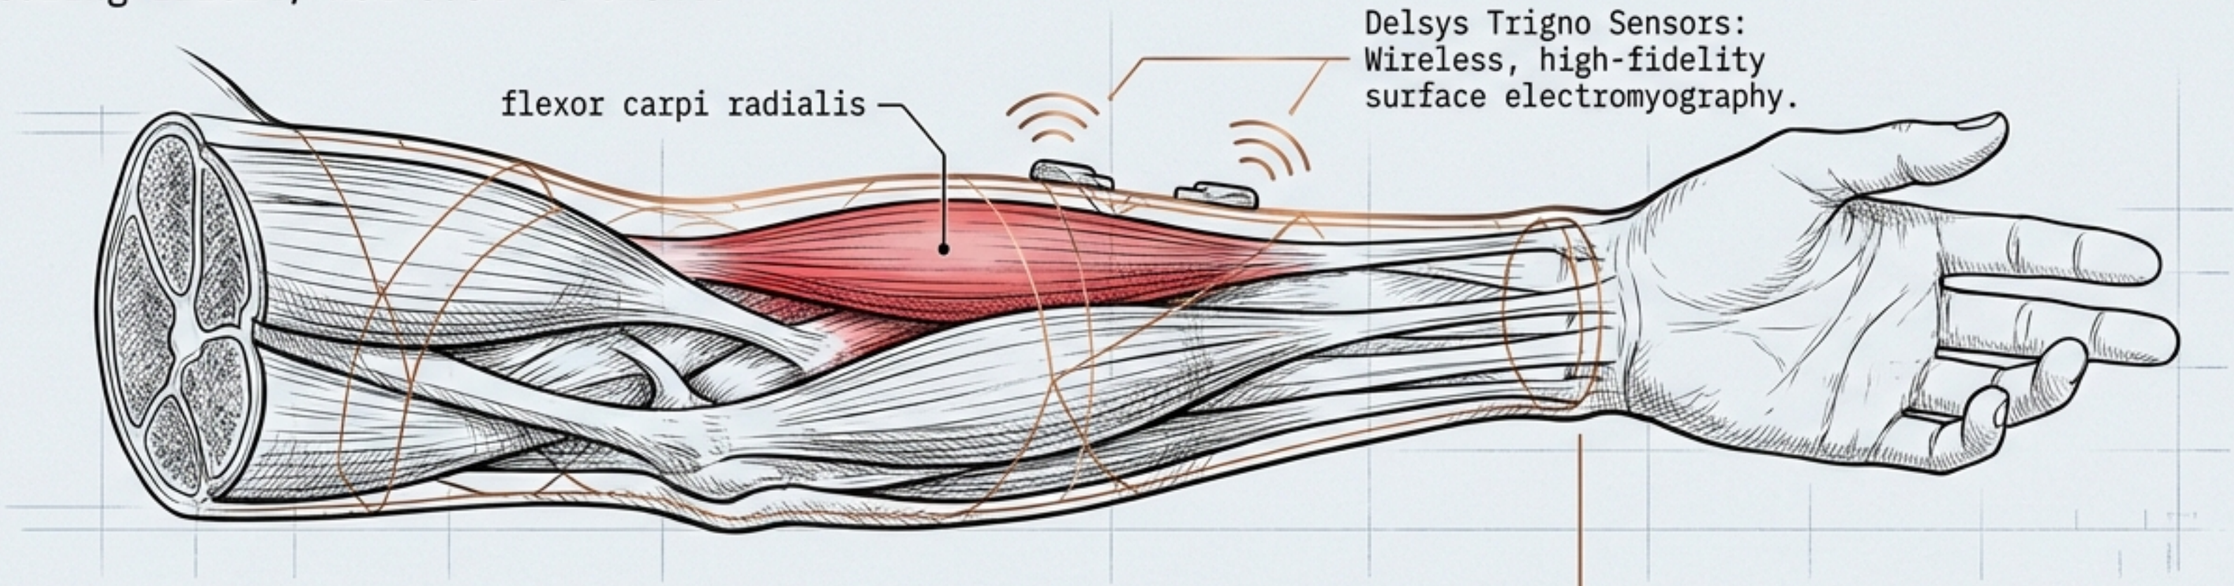
1. **CapturyLive:** Markerless optical tracking. Volumetric optimization handles occlusion (no suits required).
2. **Rokoko Smartgloves:** Hybrid IMU + EMF (Electromagnetic Field). EMF coil creates a local magnetic field to eliminate drift.

100 fps real-time tracking with zero lag.

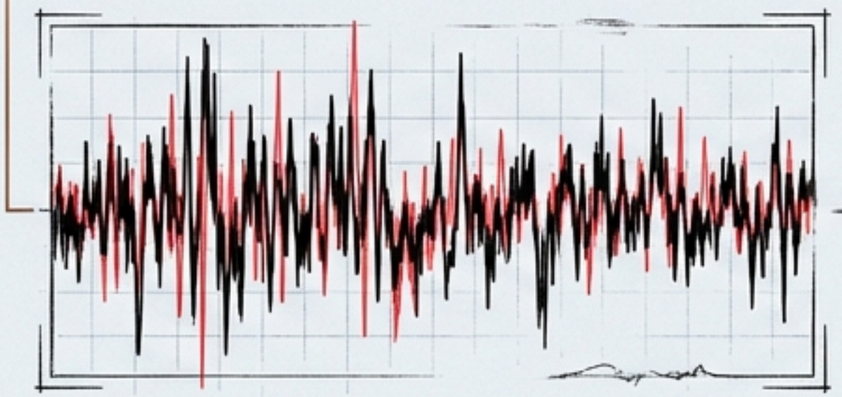
NotebookLM

LAYER 2: THE BIOMETRIC SIGNAL (sEMG)

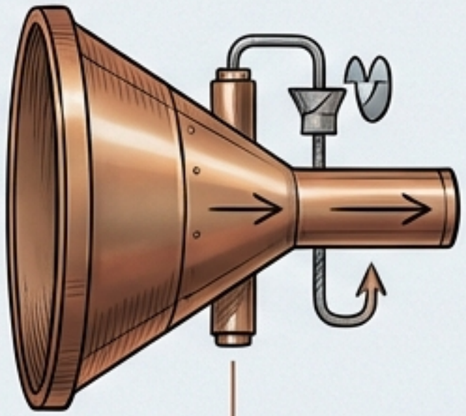
Measuring Effort, Not Just Movement.



Raw Noise



Filters: 70Hz High-pass / 48-52Hz Notch



The Lough Signature

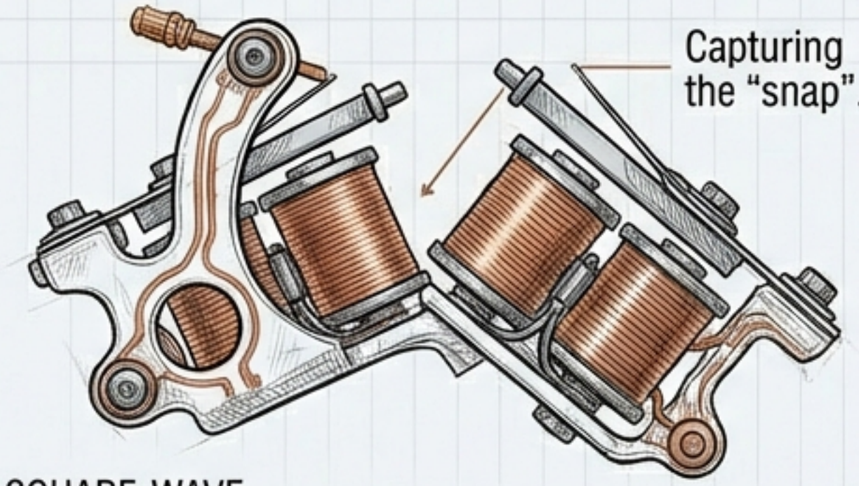
Deep Learning (Dilated Causal Convolutions) maps muscle tension to artistic output.

NotebookLM

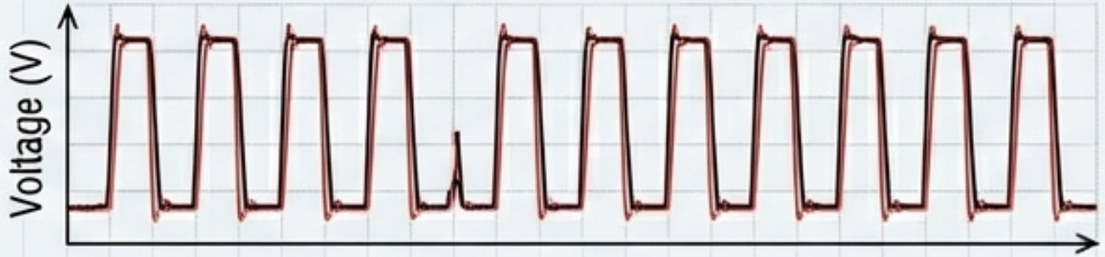
LAYER 3: MACHINE TELEMETRY (THE MECHANICAL SOUL)

Synchronizing the tool's voice with the artist's hand.

COIL MACHINE (VLAD BLAD INFINITE LINER)

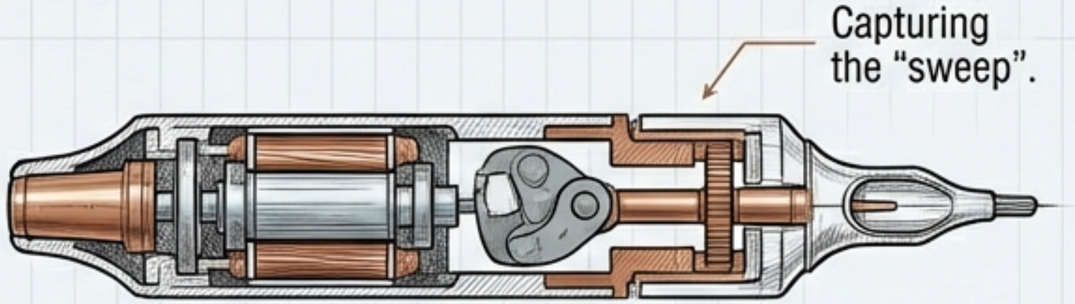


PUNCHY SQUARE WAVE

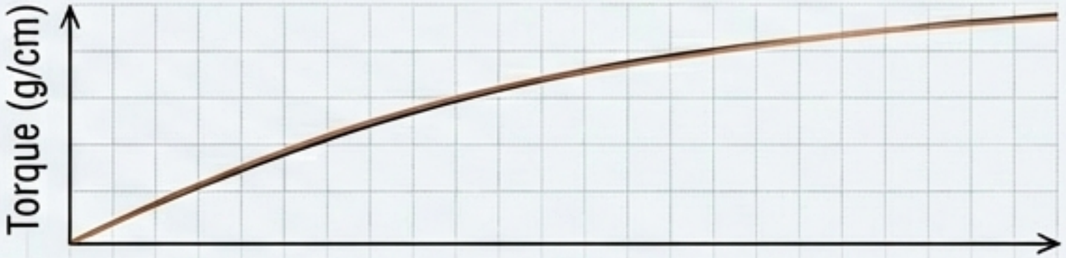


- Duty Cycle: 55%
- Rhythmic Metronome.

ROTARY PEN (ULTRON 3 MAX)



SMOOTH LINEAR TORQUE CURVE



- RPM: 8500+
- Torque: g/cm.

CORE CONCEPT: Capturing the "snap" vs. the "sweep"—the mechanical difference that defines the style.

NotebookLM

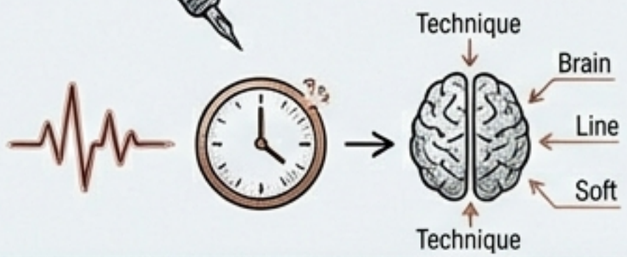
INTELLIGENCE CORE: VERTICAL AI INTEGRATION

Synthesizing biological, machine, and visual data for mastery.

VIDEO STREAM

sEMG BIOSIGNALS

MACHINE AUDIO

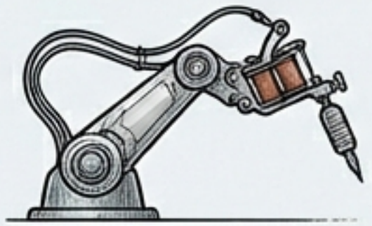


THE INTELLIGENCE CORE
(MULTIMODAL TRANSFORMERS)

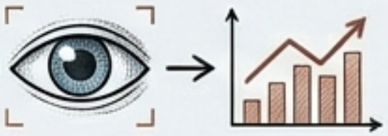
AUTOMATED SCORING

HAPTIC FEEDBACK

ROBOTIC EXECUTION



- Real-time processing latency: 1.1ms - 1.3ms.
- Zero-Shot Adaptation: System understands labels like “fine line” or “soft shade” without retraining.
- Automated Scoring: 3D CNNs grade apprentices against Lancy’s benchmark.

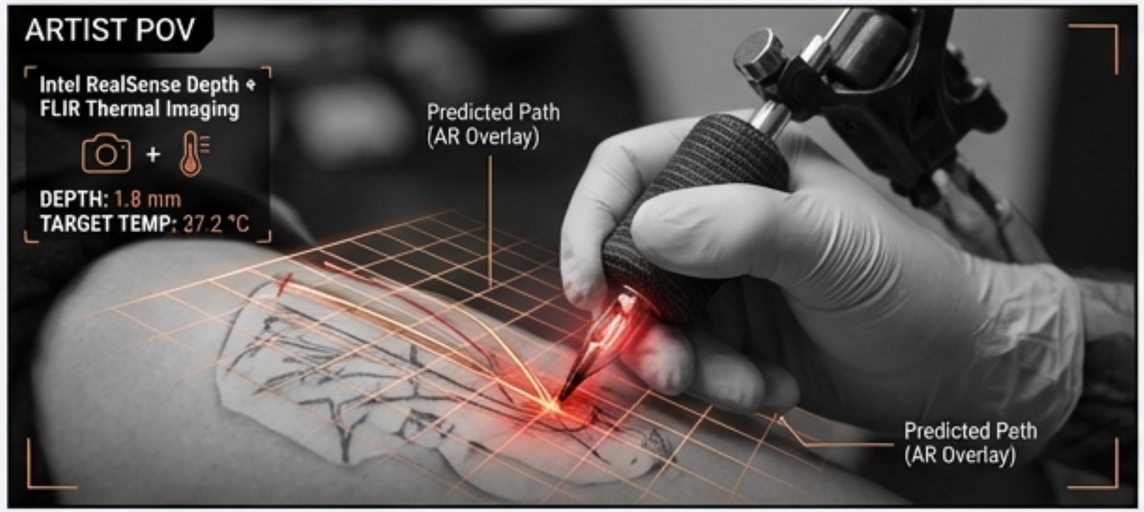


NotebookLM

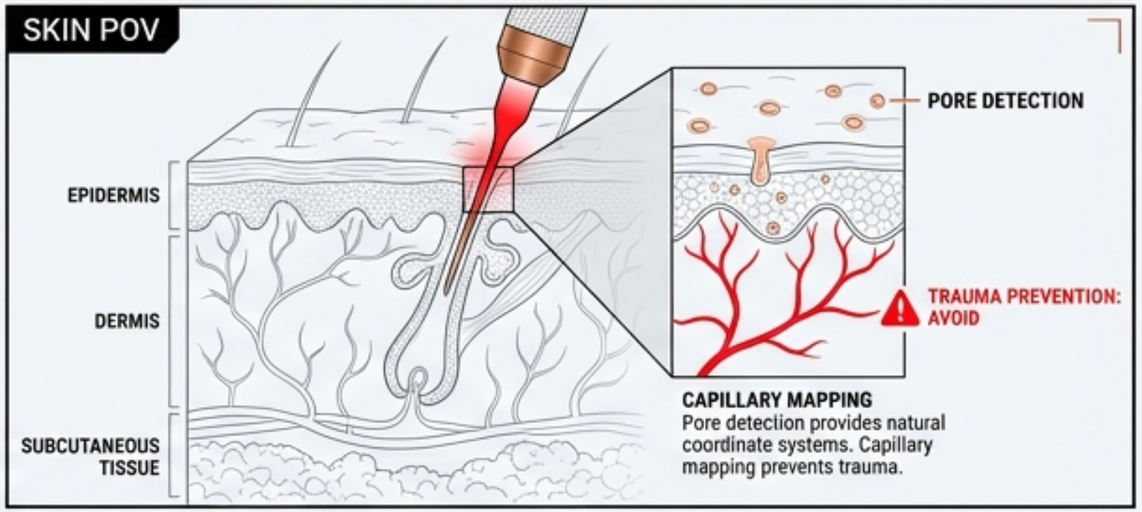
INTERFACE: SKIN AS UI

Synthesizing biological, machine, and visual data for mastery

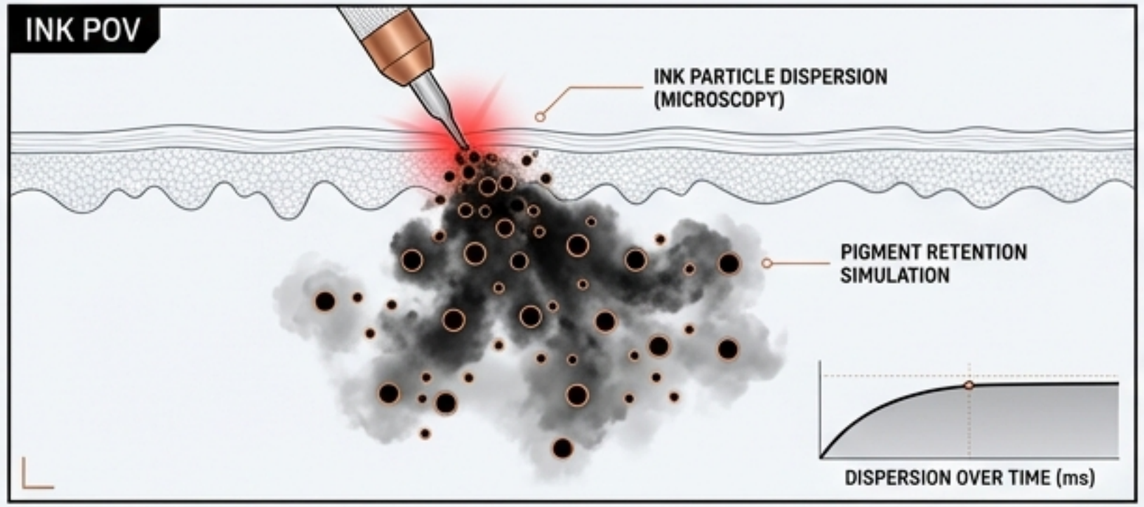
ARTIST POV



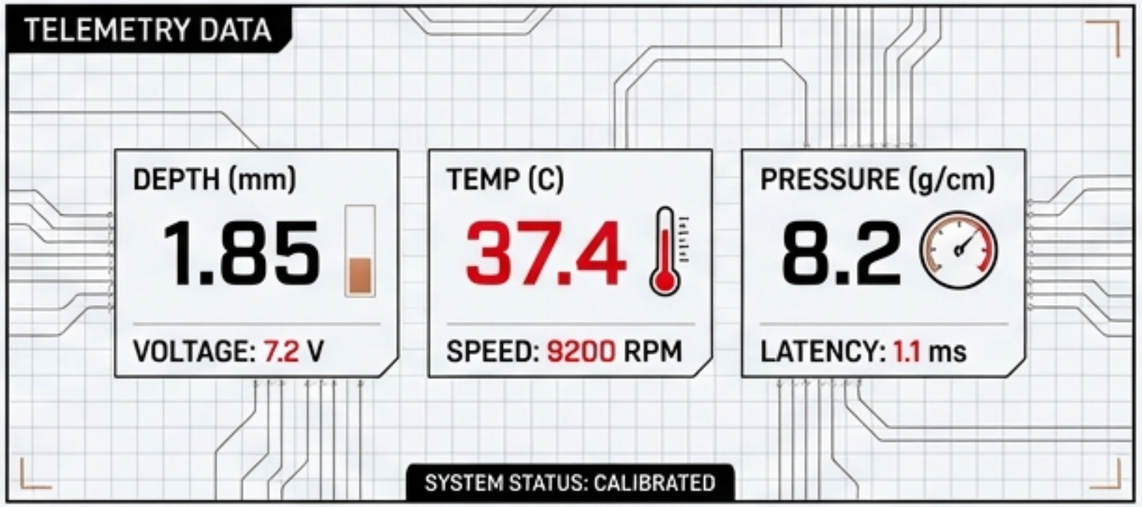
SKIN POV



INK POV



TELEMETRY DATA

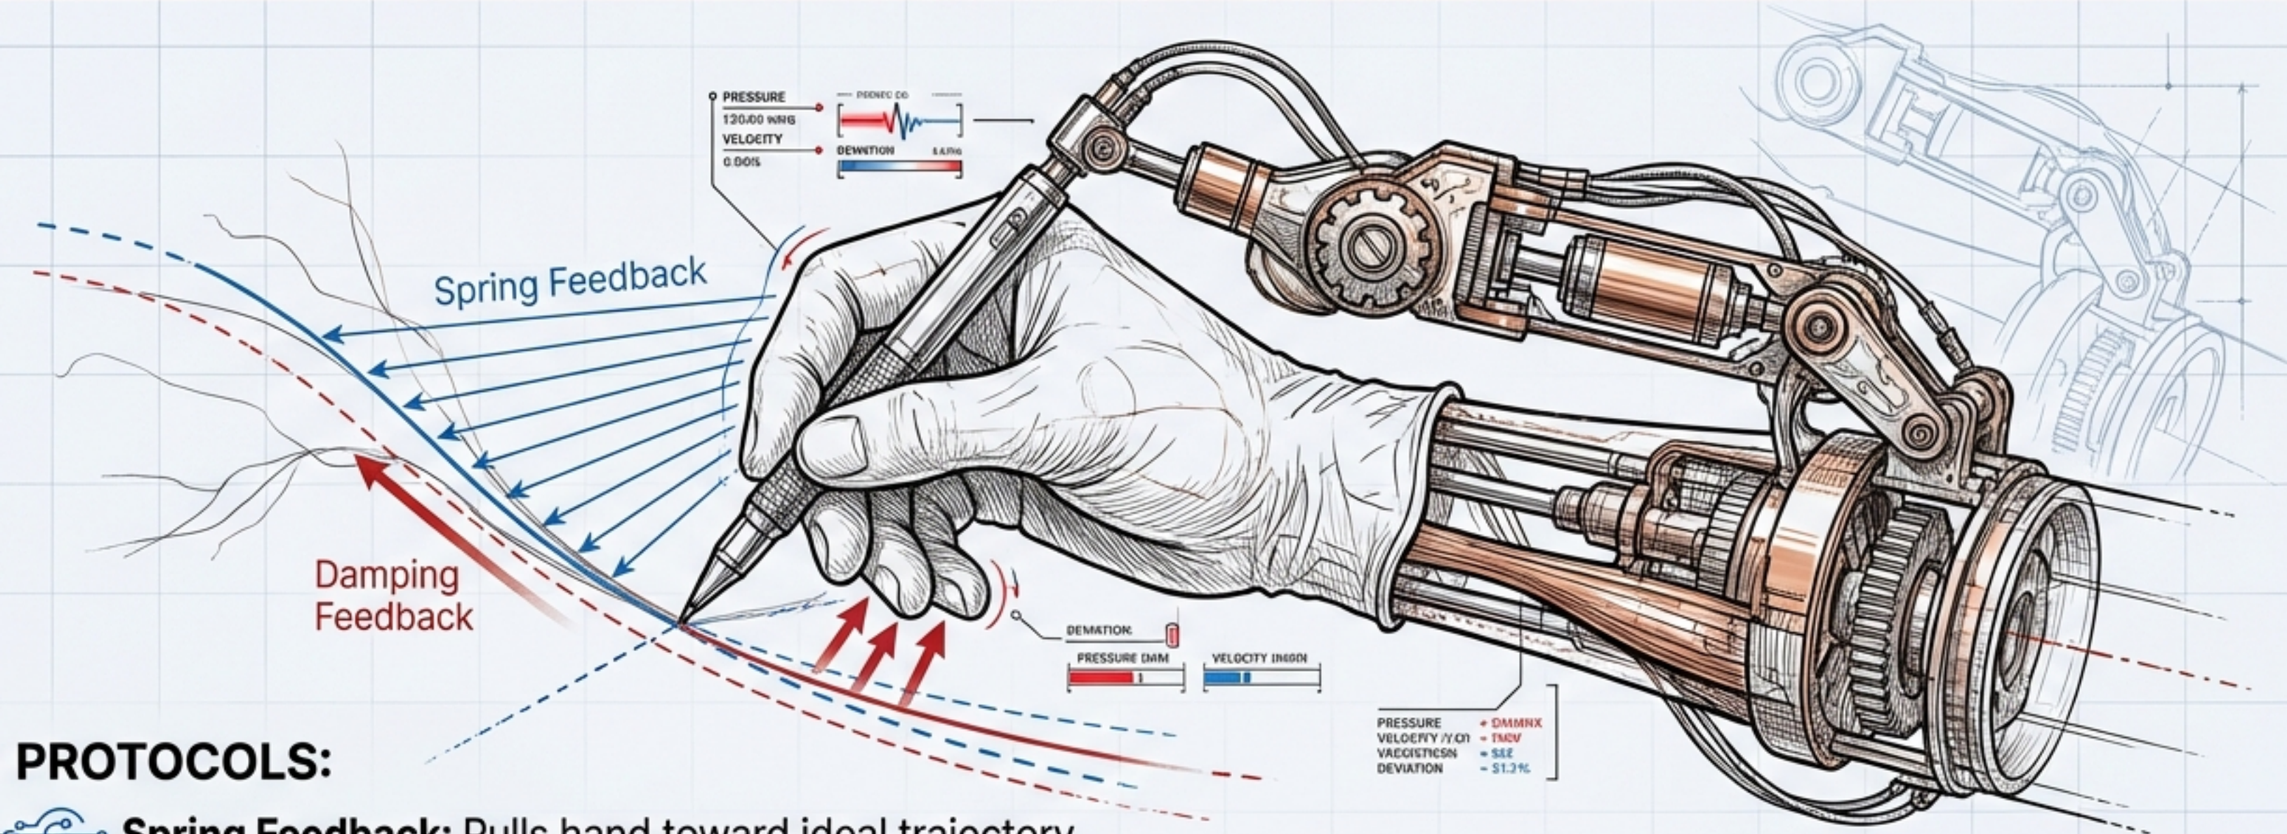


CONCEPT: Pore detection provides natural coordinate systems. Capillary mapping prevents trauma.

NotebookLM

THE OUTPUT: HAPTIC GUIDANCE & SKILL TRANSFER

Digital Apprenticeship via Proprioceptive Muscle Memory.



PROTOCOLS:

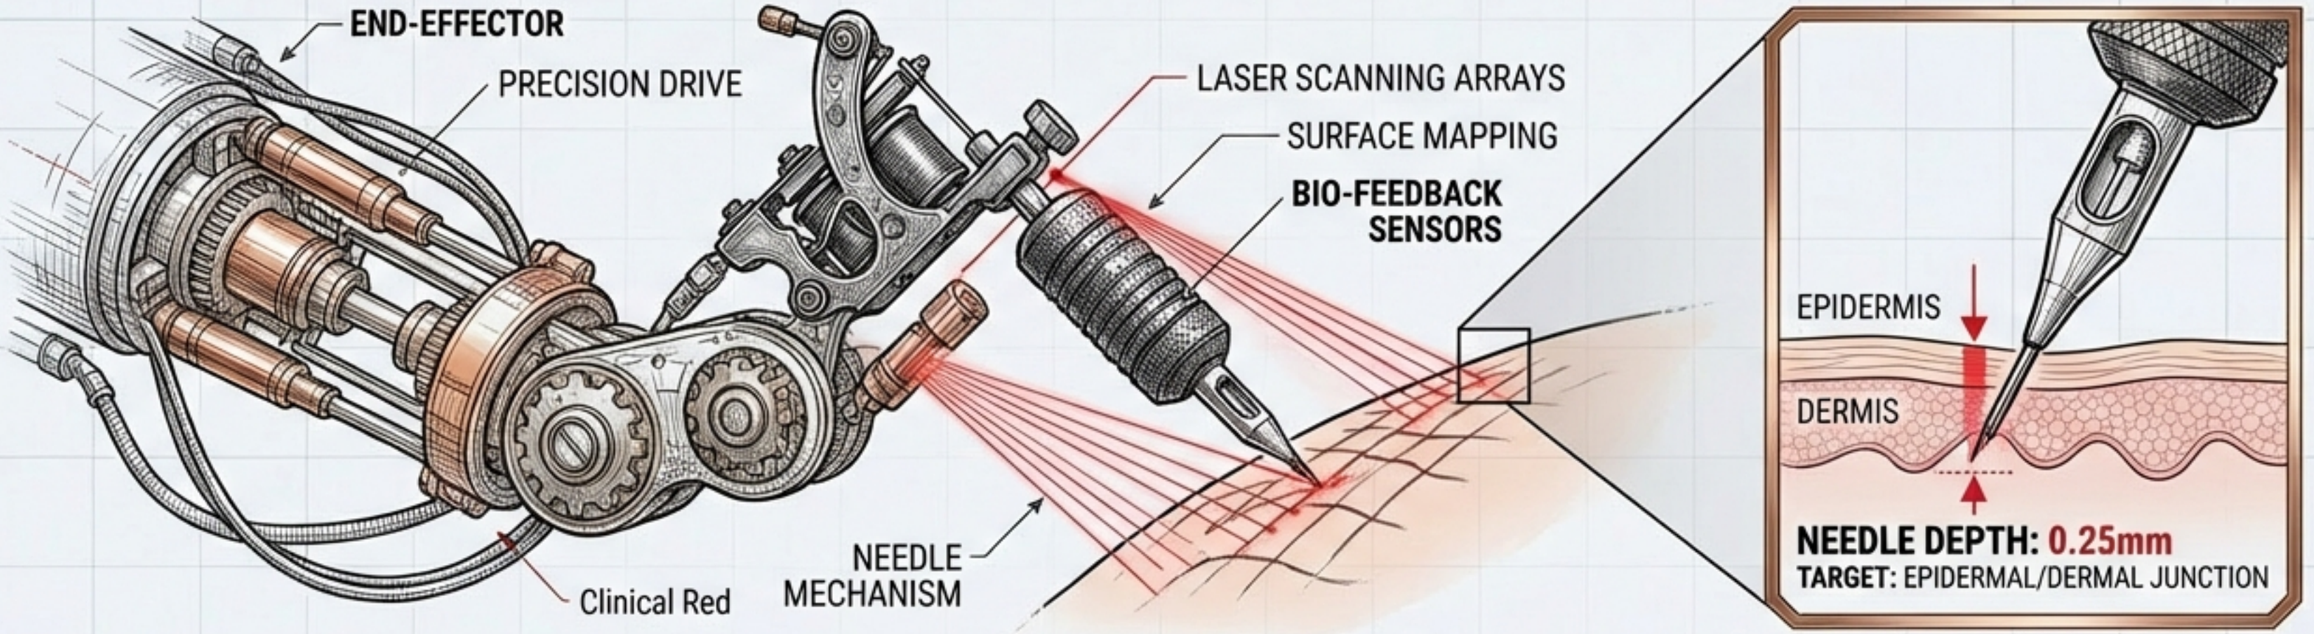
- **Spring Feedback:** Pulls hand toward ideal trajectory.
- **Damping Feedback:** Smooths out tremors.
- **Haptic-ACT:** Learning “soft contact” to prevent tissue damage.

RESULT: The apprentice feels the “ghost” of the master guiding the needle.

NotebookLM

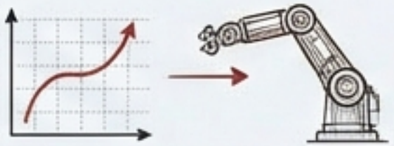
EXECUTION: AUTONOMOUS REVITALIZATION

From Digital Twin to Physical Reality.

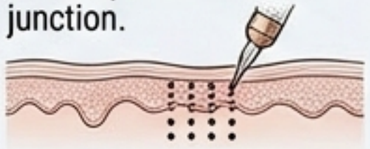


TECH INTEGRATION

- **Traj2Action:** Translating human trajectory to robot motion.



- **Blackdot Technology:** High-precision dot etching at the epidermal/dermal junction.



KEY BENEFIT

Pain mitigation sensors reduce pain to **0-2/10** (vs standard 5-8/10).

0-2 (PAINLESS/MILD) | STANDARD (5-8)

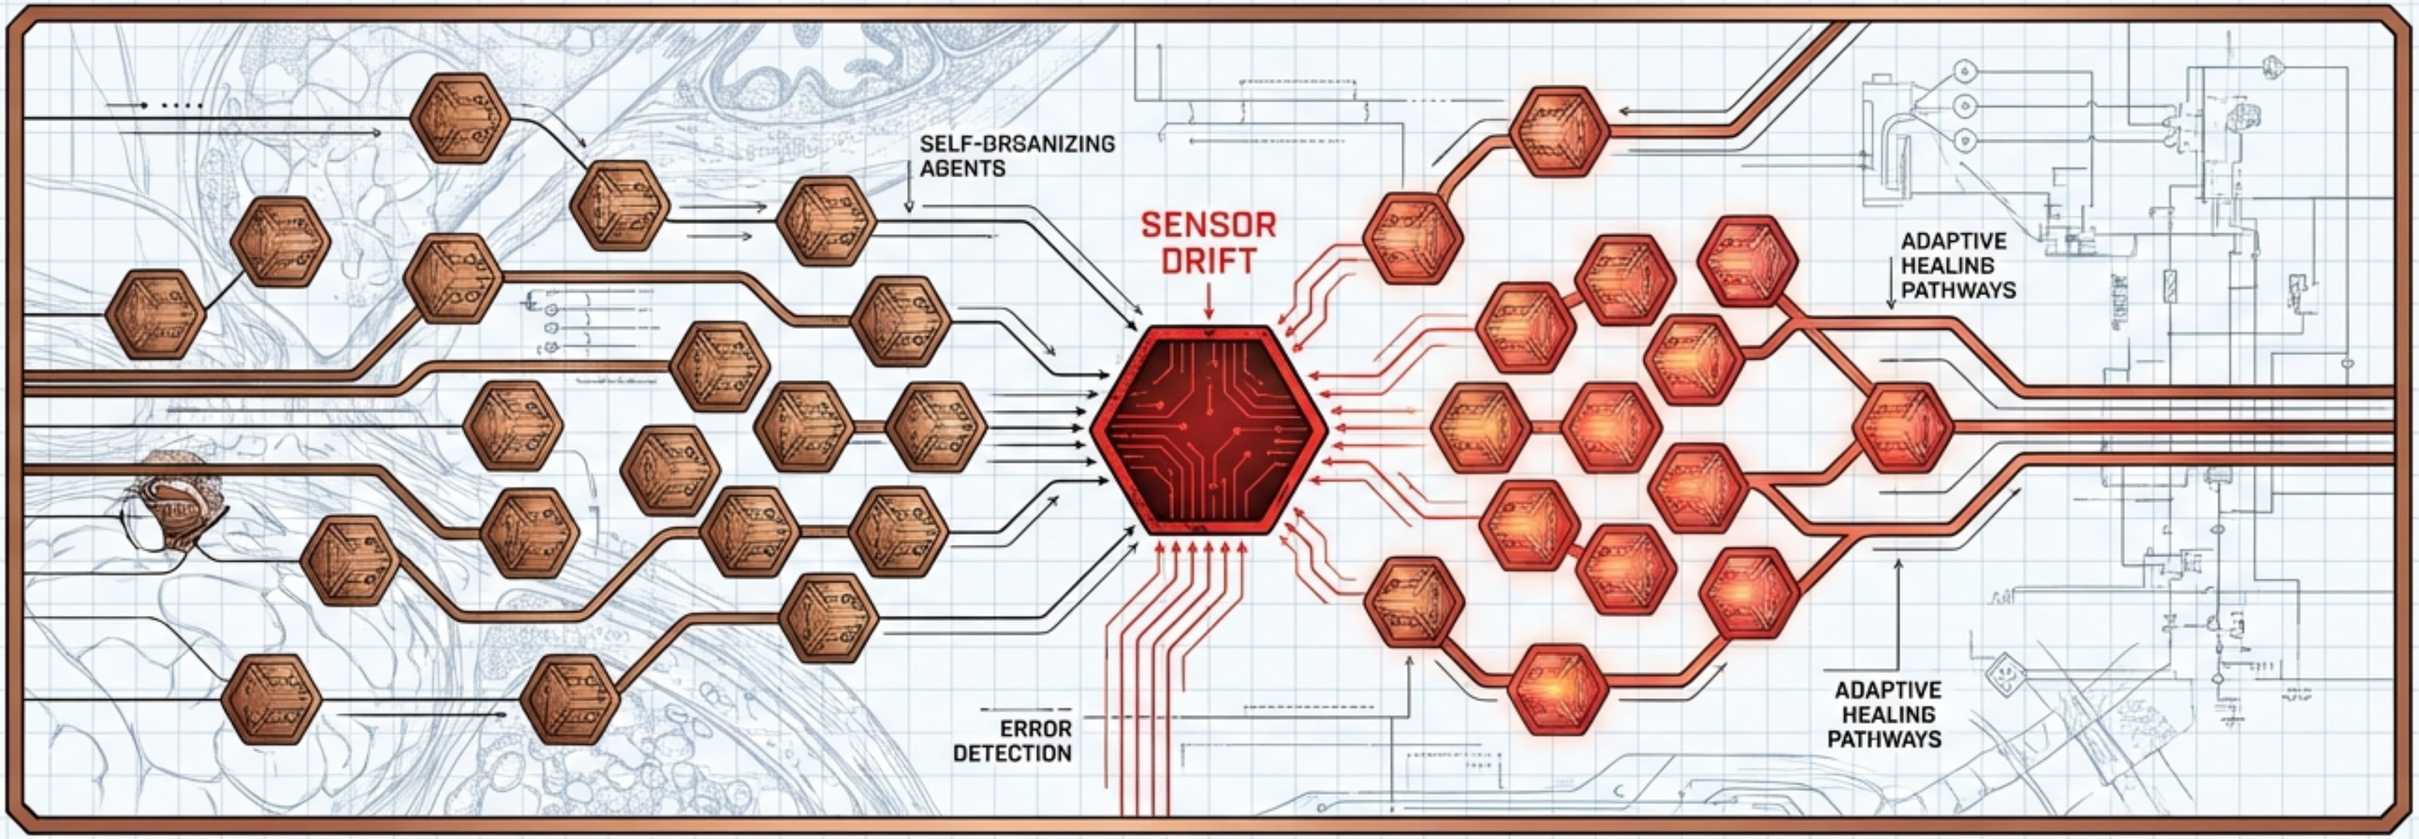
CONCEPT

The Virtual Guest Spot - Remote execution of Lancy's designs.

NotebookLM

INFRASTRUCTURE: FIELD-EXCITED PROGRAMMING (FEP)

Biological Code for a Biological Medium.



CONCEPT:
A “Swarm Intelligence” paradigm. Functional blocks act as autonomous agents that self-organize to handle errors like latency or data lag.

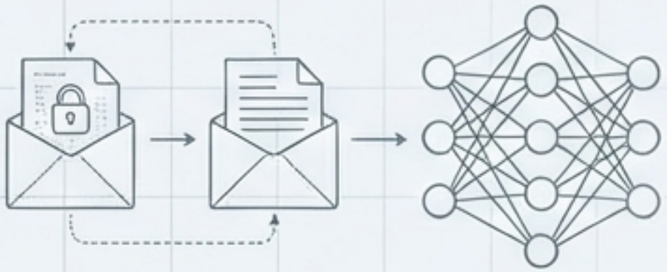
ANALOGY:
Code that heals itself, mirroring the immune system of the skin.

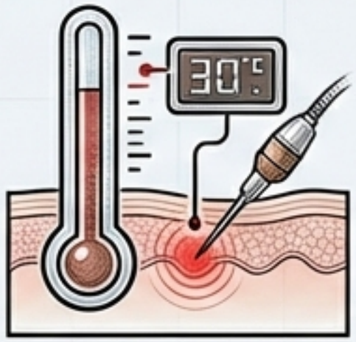
NotebookLM

ETHICAL FRAMEWORK: SOCIO-TECHNICAL INTEGRITY

CONSENT & AGENCY.

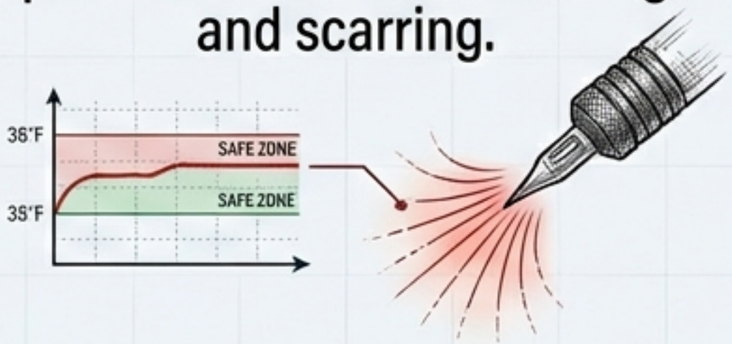
Data acquisition protocols ensure the artist owns their "Digital Ghost".





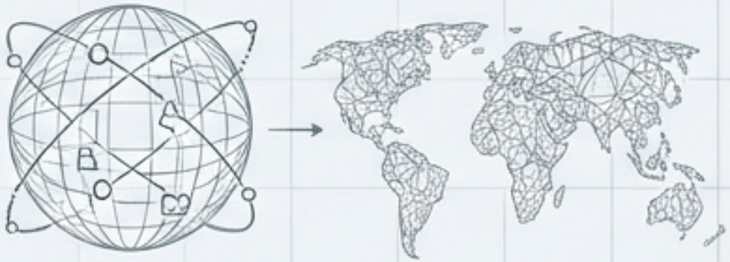
HARM MITIGATION.

Real-time thermal telemetry prevents tissue overworking and scarring.



INCLUSIVITY.

AI models trained to respect respect cultural dialects in tattooing styles.



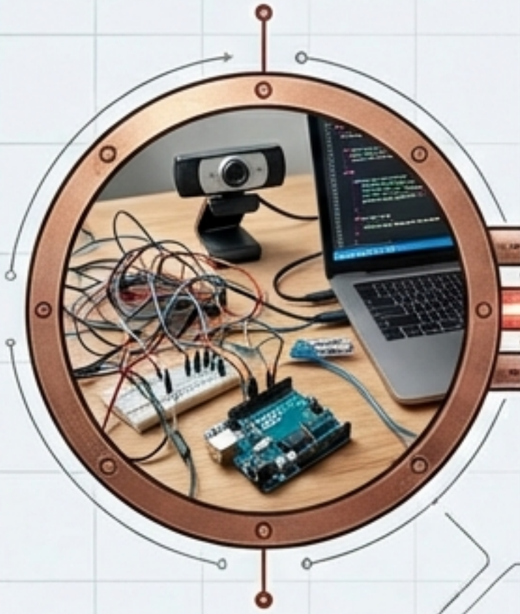
"Tattooing as Liberation Work — Preserving the personal connection through automation."

NotebookLM

THE ROADMAP: BOOTSTRAPPING IMMORTALITY

From Duct-Tape Prototype to Industrial Standard.

PHASE 0:
The $0 Foundation
(Webcams + Python)



PHASE 1:
Validation
(Grant Hunting/NEH)

PHASE 2:
The ‘Real Data’
Prototype

PHASE 3:
The Investor Demo
(Full Haptics)

PHASE 1:
Validation
(Grant Hunting/NEH)

NotebookLM

CASE STUDY: “THE FIRST PRINT”

- **Artifact:** Lough Line 001.
- **Result:** Flawless replication of the unique “snap” and pressure profile.
- **Validation:** Apprentice Jet achieved a “Lough Signature Score” of 92% using the haptic rig.

> **“That’s my hand. THAT’S MY GODDAMN HAND!”** — Lancy Lough.

NotebookLM

THE FUTURE: THE VERTICAL AI ERA

From Iron & Ink to the Tactile Internet.

Future Applications:

- Surgical Training
- Physical Therapy
- Heritage Craft Preservation.

Let's build the archive.
Let's activate the overlay.
